

ABOUT COFFEY INFORMATION

Reliable information is the key to sound decisions. Coffey Information is a specialist in scientific testing solutions with industry accredited laboratories.

We are committed to industry best practice to provide high quality, reliable and timely results. Our capabilities include construction materials testing of soils, concrete, rocks and a range of other materials. We also offer spatial information technology including GIS, geodesy, virtual reality and software development.

We operate across a number of sectors and industries including government, commercial and residential building and construction, property, civil infrastructure, defence, marine, heavy industry and resources.
